

# Hatebreed, Straight To Your Face

Straight to your face with the truth!  
The longest it takes for you to achieve  
The faster they want to see you break.  
It's in their nature to try to destroy  
What they know they could not help create  
I've seen it for years and i know first hand  
Who is genuine and who is fake  
The rest of the leeches will come and go  
Good riddance, we hated you anyway  
Straight to your face with the truth!  
Sometimes it gets hard  
When the road to the future take you back  
To a better day, you wonder and ask yourself  
Where the time went and why some people  
Had lost their faith  
Though some memories and the friendships we had over time  
have begun to fade  
We're stil right here and we're stronger than ever  
What we've done can never be taken away
