

# Heather Nova, Maybe An Angel

I put my hands  
Where your wings should be  
I put my feet  
Where the earth should be

And I can't see very far  
And when you said that you were dead I hung on

Something I feel  
You are an angel, or maybe you could've been  
Something out here  
You are an angel, or maybe you could've been

I've got this light  
Hangs over me  
I've got this fear  
Cuts into me

And I can't see very far  
And when you said that you were dead I hung on

Something I feel  
You are an angel, or maybe you could've been  
Something out here  
You are an angel, or maybe you could've been

See how they run  
And nobody said you would go  
See how they fall

And I can't see very far  
And when you said that you were dead I hung on

Something I feel  
You are an angel, or maybe you could've been  
Something out here  
You are an angel, or maybe you could've been

See how they run  
You are an angel  
See how they run  
All the same, all the same  
Something out here  
You are an angel
