

Heather Nova, Nothing

Nothing

The truth comes over me
like wine, like summer heat
The world it moves too fast
I miss my simple past

And I can't see
for all the things I think I need
Brother take me out to where the reef and
where there's only only green sea
Brother take me out to where the reef and
I only want to want nothing

Child she knows it's good
She plays the way she should
And her days they taste like lime
She moves in perfect time

And I can't see
for all the things I think I need
Brother take me out to where the reef and
where there's only only green sea
Brother take me out to where the reef and
I only want to want nothing

Nothing

There's no promises
Today is all there is

And I can't see
for all the things I think I need
Brother take me out to where the reef and
where there's only only green sea
Brother take me out to where the reef and
I only want to want nothing

Nothing

Nothing
