

# Hell Is For Heroes, Discos And Casinos

get set for the rush  
we're on the ascent  
thrust ignite  
acceleration  
pressure drop  
it's only natural  
it draws the breath from your lung

in the air, in the air now  
we can make this right  
we can work it out  
we can conquer our  
fear of flying

breathing normal. shaking stable. back on auto. under control.  
so leave me to my own devices  
I'm losing time but making up ground
