

Heroes Get Remembered, Water

Guess I've never got it right
I was part of the plan and I couldn't step back
We're stuck inside of this machine
If we never gonna thrive, this is how we gonna live

This time I open my eyes saving a part of me
We will never survive in this reality

Artificial race in a superstitious world
Sanity has seemed to fade away
Big red button game, no one knows who's in control
I blame myself there's no one else to blame

This time I open my eyes saving a part of me
We will never survive in this reality
