

# Himsa, Kiss Or Kill

Kiss or kill at fallen will  
Her dark embrace of sorrow spills  
Heed the heart at bent knee  
Screams farewell from deep beneath  
Hate and hide through outside eyes  
Craves the ache of our demise  
A slower death - subsiding sting  
Hush the tones of searing peace  
Let it seep in this divine suffocation  
She took my breath away  
You held perfection  
Wrapped in persuasion

My fallen angel of darkened bliss  
The luminous stare of innocence  
Reopen the wounds of forbidden loss  
Your cathartic mystery cut me twice as hard  
Those poisoned lips of tenderness ployed  
Pierced through to kill me twice as hard  
The warmth of desire  
So transcendent and dangerous  
When the risk of romance is hopeless  
So fucking hopeless

Your presence lingers  
And keeps a sadness in this smile  
Each captured moment now lies face down

Sweetness I keep my fingers crossed  
As I lay and wait  
Lovingly by your side  
For one last caress
