

# Hobbie Stuart, Still Here

I was speaking to my dad and he told me that  
Don't expect to give nothing and then get something back  
Scratch the silver of card and then win a life  
Cos the world don't owe you anything you didn't buy  
And yeah we all wanna be better of  
But in the end we're still breathing and that's a lot  
You can have all the billions like a Steve Jobs  
And still never get to see your own super yacht

Whatever we've done or wherever we've been  
We're still here, we're still here, still here  
And no matter how bad of a mess we're in  
We're still here, we're still here still here yeah

I was speaking to my mum and I told her that  
Academia was something I could never hack  
I've done some bad things yeah and that's a fact  
But I'm gonna make her proud and I promise that  
Now all the kiddies that I'm walking past  
Are the very same ones that would give it large  
Acting like they would go on and do something big  
Fast forward couples years and they never did

Whatever we've done or wherever we've been  
We're still here, we're still here, still here  
And no matter how bad of a mess we're in  
We're still here, we're still here still here yeah
