

Hole, Babydoll

Here you come sucking my energy
And you suck it up right off the street
Babydoll
Here you are sucking my energy right up
Drill it in my good hole so that I can see
You are so much bigger than me
You are so much bigger than me
Babydoll
My raw hand, my fever blister, watch me
Watch me, watch me disappear
Here she comes, her pants undone
All waste and void, all waste and void
There you go in your Nazi car
Oh babydoll, what a whore you are
You sit around with your old rag
How can I talk when you've got the gag?
Here you come sucking my energy
And you suck it up, baby, right off the street
Babydoll
In the dark I destroy
What I began, what I destroy
She's hanging in the blossom tree
Babydoll just bleeds for me
Babydoll
Babydoll, she's on the field
Her chemical wedding and her chemical peel
I knife me and I slash mine
And I knife me and I slash mine
Sick and sorry me, well, here you are as ugly as me
Drill it in my good hole so that I can see
Drill it in my good hole so that I can see
Here you come sucking my energy
And you suck it up, baby, right off the street
Babydoll
She stares too long into the sun
Now I want a cancer that the crooked eye spun for you
I don't mind my energy
'Cause baby, you are so much bigger than me
Babydoll
Little girl, she's on the floor
She gets it all 'cause she's a whore
Little girl, she's on the ground
She gets it all for falling, falling down
Falling down
"I am, I am," she says
"I am not free," she says
"Help me, I am withering...withering...withering..."
Hang on, you'll get your soul
It's a soul
Hey it's a soul, it comes down
See, see it's a soul
