

# Holly Palmer, Just So You Know

Tell me baby  
If maybe we could put the top down  
The sun is flying so high today  
And the shine off your cherry fenders  
Would be too much but not too much  
With your hand reach out  
With your mouth shape the phrase  
And say

Just so you know  
Just so I know  
Just so we know  
We're together  
If I can look in your eyes  
And see what I feel then it's real  
And I know  
We're together

With your eyes look over  
With your car pull over  
That's all it's gonna take  
'Cause I have been paying very close attention to your habits  
Somebody over there at the counter  
In the diner on the corner in the corner of my mind  
Wears your face  
On a different day I am someone else too  
And we disappear together  
We fold up and fly away like paper airplanes  
We rub each other's creases and line up each other's angles  
And we choose the brightest papers and we fly

Just so you know  
Just so I know  
Just so we know  
We're together  
If I can look in your eyes  
And see what I feel then it's real  
And I know  
We're together

'Cause we could really take our time  
We could really get our shapes just right  
And fly off each other into the night  
And where we land is out of our hands  
And so in this way we don't stop  
We never stop  
We don't stop  
We won't stop baby

Chorus
