

# Hot Rod Circuit, Smithsonian Liver

Why am I not surprised by your condition  
When you look at me and ask me what to do  
And I say to you you need to think this through  
Last time we had a confrontation it was a suplex situation  
And I'm not going to end up on the ground again  
I'm staying out of this  
This is your own mess that you've got into  
Have a cigarette hope the best turns out for you  
And I say you you need to think this through  
Why can't we just laugh forget and move on  
Let's make a toast from coast to coast for all the things we've done
