

Hot Rod Circuit, Smithsonian Liver

Why am I not surprised by your condition
When you look at me and ask me what to do
And I say to you you need to think this through
Last time we had a confrontation it was a suplex situation
And I'm not going to end up on the ground again
I'm staying out of this
This is your own mess that you've got into
Have a cigarette hope the best turns out for you
And I say you you need to think this through
Why can't we just laugh forget and move on
Let's make a toast from coast to coast for all the things we've done
