

# Hughes Turner Project, Revelation

If I look familiar  
It's only what you see  
It's your perception  
What I used to be  
So saturated  
I wear a different face  
I'm so frustrated  
With the human race

No you can't live for me  
Don't want your sympathy  
The cut's too deep you see  
I got your remedy  
Do you really wanna go there with me  
Don't ya know it's really something to see  
Do you really wanna go there with me  
Don't ya know it's really something to see

Here comes the change so let's open the door  
I'm not the same anymore

Don't want your conversation  
Don't need no aggravation  
That's when I knew I had a revelation  
Don't need no demonstration  
I'm in my transformation  
That's when I knew I had my revelation

Am I a stranger, am I a friend  
But your don't think you know me  
You had a better look again  
Feel so infected with all the lies  
Get resurrected  
Open your eyes

I got so much to say  
You're gonna hear me anyway  
Ain't gonna make a no big display  
So what's up? Get outta my way

Do you really wanna go there with me  
Don't ya know it's really something to see  
Do you really wanna go there with me  
Don't ya know it's really something to see

Here comes the change  
So let's open the door  
I'm not the same anymore

Don't want no confrontation  
Don't need no situation  
That's when I knew I had my revelation

Don't want to condemnation  
I got my inspiration  
That's when I knew I had my revelation
