

Huntingtons, Don't Clone Me

my parents think i'm crazy
some paranormal seed
they called the family doctor
he knows just what i need
they took me to the hospital
said i'm a moral threat
they figured out which dna
would make me function correct

don't clone me (x4)

i layed down on the table
they said to breath in deep
i saw my parents smile at me
before i fell asleep
they finished the procedure
and no it wasn't cheap
but now they can pick which one of me
that they'd prefer to keep
