

# Immortal, Winter Of Ages

Winter Of Ages

I stride purposefully through the snow  
To the icy vasts at dusk  
Crystals swirl by northed dim  
Majestic be this winter  
Winterdemons winterbeasts  
Further my visionary means  
Blast into dominance  
Milleniums filled with pride  
Winters of hate winters of pain  
Winters of sorrow  
These winters awaits  
Nebular fog aurora fog  
Await us all in the seasonal cold  
I stride purposefully through the snow  
To the icy vasts at dusk  
Drawn by our will  
From the coldest regions  
An ice age comes  
Minds into the elder dryas  
Majestic panorama  
Across the lands  
Our mark shell flow  
Winters of winters of pain  
Winters of sorrow  
These winters awaits  
Nebular fog aurora fog  
Await us all in the seasonal cold
