

Indigo Girls, We Are Together

The girl's known trouble the wind's to blame it blew her to anytown USA and that's my middle name
And where we go remains nameless a motion picture alive and frameless
And we are together finally the dog caught up with the rabbit is laughing hysterically
And we are together you and me yeah
Got that sadness twinkles like a witch conjure a love spell I'm gonna give up the five-year itch
Low to the ground high in the holler in any old February hot under the collar

And we are together finally the dog caught up with the rabbit is laughing hysterically and we are together
The setting sun at sadness beach just in view and out of reach
Resign myself to solitude when love is hard to get and rude
And though I said I did not care
It was way before we'd gotten there
Winded by the fruitless chase until I saw you face to face
Together finally the dog caught up with the rabbit is laughing hysterically and we are together you and me
