

# Informatik, The World Belongs To Us

Look around  
At the world today  
Our precious home  
Withers in decay  
what once was ours  
is now torn and stayed  
we wondered how  
it got this way

Years will come  
Years will go  
kingdoms rise and fall  
the time has to take control  
the world belongs to us

the years will come  
the years will go  
kingdoms rise and fall  
the time has come to take control  
the world belongs to us

Long ago  
a choice was made  
the human rules  
the rest obey  
now we are taught  
how to behave  
don't question why  
and don't complain

the world belongs to us...

Years will come  
Years will go  
kingdoms rise and fall  
the time has to take control  
the world belongs to us

a single drop of water  
becomes a mighty fall  
People of the Earth  
The world belongs to us

now its time  
to demonstrate  
that you and I  
can make history  
tear down the walls  
that separate  
to make us weak  
and keep us afraid

years will come  
years will go  
kingdoms rise and fall  
the time has to take control  
the world belongs to us

a single drop of water  
becomes a mighty fall  
people of the earth  
the world belongs to us

years will come

years will go  
kingdoms rise and fall  
the time has to take control  
the world belongs to us

a single drop of water  
becomes a mighty fall  
people of the earth  
the world belongs to us
