

Isis Gee, Share my world

It Feels like we're all alone
With no one watching
Your eyes light up the room
From clear over there
And it feels like
I wanna open
The path to your heart
No more lonely nights
Cause we feel alright
And I know that you're my home
All alone in the web of life
I was hanging on the edge of time
Wishing love would just come and find me
Someone who would take the time
To look inside of my fragile mind
And I know that way that you're falling
And I know the way that you're calling
Open up, facing the crime
Life sentence me, I'll do the time
Come here and share my world
Come here and share my world
I would write the sky for you
And seal the stars like pearls of truth
Come here and share my world
Come here and share my world
It feels like we're onto love
Something with meaning.
And All of my life I waited for
My better half
And surrender never felt so
Clearly amazing before
For it's plain to see
What you mean to me
My heart is an open door
All alone in the web of life
I was hanging on the edge of time
Wishing love would just come and find me
Someone who would take the time
To look inside of my fragile mind
But now I know I'm falling
Open up, facing the crime
Life sentence me, I'll do the time
Come here and share my world
Come here and share my world
I would write the sky for you
And seal the stars like pearls of truth
Come here and share my world
Come here and share my world
We made it
And I know that you
You were worth the wait
Don't let go (don't let go)
We're falling
For life yeah
I saw you from the door
Eyes met across the floor
You had me at hello
I felt it at the core
Relieved that you were alone
Been hurt before but I've grown
I wanna know the signs
Your love has changed my life
Open up, facing the crime
Life sentence me, I'll do the time

Come here and share my world
Come here and share my world
I would write the sky for you
And seal the stars like pearls of truth
Come here and share my world
Come here and share my world
