

Jack Penate, We Will Be Here

So small, oh so small are we
By we I mean all humanity
Endless universe out in front of me
Some say earths a tiny obscurity
Maybe in size, but if your wise
And close your eyes
Lose all youre guise
Part of the deal
Is do not conceal
That we can feel
This is all real
The stars cant feel a lovers touch
The kiss that makes your body rush
Embrace your sleeping sweetheart with hush
And the words I love you mean so much
Above in the sky
Diamond lights fly
Makes us think why
Were here then we die
Questions are asked
But Answers dont last
We look to the past
For comfort so Fast
The stars cant feel a lovers touch
The kiss that makes your body rush
Embrace your sleeping sweetheart with hush
And the words I love you mean so much
I can wish upon a star but wouldnt wish to be that far
I can wish upon a star but wouldnt wish to be that far
I can wish upon a star but wouldnt wish to be that far
I can wish upon a star but wouldnt wish to be that far
I can wish upon a star but wouldnt wish to be that far
When times passed so long
When the world has gone
There wont be this song
But that isnt wrong
Love will be here
In atoms of tears
Kisses and fears
Live on all years
The stars cant feel a lovers touch
The kiss that makes your body rush
Embrace your sleeping sweetheart with hush
And the words I love you mean so much
I can wish upon a star but wouldnt wish to be that far
I can wish upon a star but wouldnt wish to be that far
I can wish upon a star but wouldnt wish to be that far
I can wish upon a star but wouldnt wish to be that far
I can wish upon a star but wouldnt wish to be that far
We will be here
