

Jean Michel Jarre, Millions Of Stars

Venus
Uranus
Callisto
Sirius
Jupiter
Pluto
Mars
Saturn
Millions of stars, shining around, shining around
Millions of trees, growing along
Millions of blackbirds, flying around
Don't feel alone
Vega
Calliope
Atlas
Ganymede
These angels
Fly
In the wind
All these angels
Fly
In the wind
All these people
Cry
In the wind
All these memories, all these memories
Carried away
By the wind
All these flags
Floating
In the wind
All these words
Lost
In the wind
And all these lovers
And all these (big) lovers
All gone
With the wind
