

Jean Shepard, My World Is You

If you gave me the moon in the heaven and added a star or two
It couldn't compare with the love we share cause my world is you
No no one has ever had a feeling like the one I have for you
Each beat of my heart keeps revealing that my world is you
My dreams won't end if you should leave me life would be so empty without you
In all the world there's no other to love me like you do
If someone ever came between us my world would all fall through
For darling you see you're just a part of me cause my world is you my world is you
