

# Jebediah, Fall Down

Thought police have busted in  
And broken up and stolen almost everything  
They've a job to do a special mission  
To reinstate their point of view  
It's in with the old order out with the new

They're the guys that wrote that song  
That's been playing on the airwaves all day long  
It's a catchy tune hummable melody  
And you can't drive it from your brain  
It's got a chorus that repeats over again

Window, opportunity  
I got a message and it comes for free  
There's another way that way is real  
But you just won't get it till the walls fall down
