

Jefferson Starship, I Will Stay

Here I am
Even though
I said I would go
Think by now
You should know
Darling I love you so
Arguments are just a trial
Only lasting for awhile
Just a smile from you
Will make me say ... I will stay

I will stay with you
Love you always like today
We got a love that lasts forever --
yes we do
And darling I will stay ... with you

In a rage
Out of spite
We say things we know aren't right
But my love
When it's over
When we're together in the night
And we're making love this way
You know that I will stay
Never go away from you
I will stay ... with you

Chorus
