Jesus On Extasy, Holy Beauty

Digital beauty on flat screens
she's the cutest ever seen
when she walks into a room
silence gathers

but she's not real
she'll never be
just bits and bytes and machinery
in your system cpu
she'll start to love you ...

Now she is gone
but she never was the one
and her holy beauty shines
now she's deleted
but she never felt complete
and her holy beauty shines

You fell in love with a machine
a program made for lust
she will be anything you want
just choose your layout
and she's got feelings for you, too
a.i. will make your dreams come true
she's your animated bride
your cyber-love will last all night

Now she is gone
but she never was the one
and her holy beauty shines
now she's deleted
but she never felt complete
and her holy beauty shines

Now let her infect you
just let the virus spread
