

# Jim Noir, Computer Song

The moment I switch you on  
You sing your song let me know it won't be long  
I tell you're going wrong and you make me cry and I don't know why  
I try control delete but it makes me upset when I have to re-set your mind  
Oh no you're turning blue, just tell me straight or do I have to wait

The moment I switch you on  
You sing your song let me know it won't be long  
I tell you're going wrong and you make me cry and I don't know why  
I try control delete but it makes me upset when I have to re-set your mind  
Oh no you're turning blue, just tell me straight or do I have to wait

Every time I try to make a silly little song  
My efforts are all wasted cos machinery goes wrong

Every time I try to make a silly little song  
My efforts are all wasted cos machinery goes wrong
