

Jimi Blue, Before you go

Before you go
A cold night, the stars are shining
I look down, cant stand your crying
I dont know why you say that you have to leave
A little touch, a lovers whisper
But deep inside the wish to kiss you
Our time will come, thats what I still believe
Tomorrow youre far away and you say
All sorrows get blown away but today
Im beggin you, babe, babe, please, please stay
(Chorus :)

Before you go
Theres something I want you to know
Baby, care about my heart
Cause it will always be with you
Ill miss you so
There was a heart now theres a hole
Think about it one more time
And let your soul decide tonight
Before you go
A flash back, your summer smiling
A butterfly, theres no denying
A paradise is what we can build with our love
But when you get the thing that you always wished to have
Sometimes you feel that you want it to be dead
And then a self-destructions going on
So why, baby, cant we be strong
Can someone help us to go on
And bring lovers back where they belong

Chorus
I know, Ill never find a better girl
Oh, baby, please come back to my world
Im gonna be your man and you will be my pearl
Think it over one more times
Think it over two more times
Chorus
