

# Jimmy Buffett, Flesh & Bone

By: jimmy buffett

If men came from venus  
And women came from mars  
Then I'd be lunching with my boyfriends  
While you girls talked about cigars  
But that's not how it happened  
Evolution took a different turn  
We may be creatures with some unique features  
But we've still got a lot to learn

We made it nearly 20 centuries  
But your monkeys with ph.d.s  
Spun a web of communications  
But it's all still a tangle to me

I can't tell the spiders  
From the dangling flies and moths  
I feel like like some outsider  
Who seems to have his wires all crossed

I can't fax you my love  
I can't email my heart  
I can't see your face in cyberspace  
I don't know where to start

I'm light years behind  
From the age they call stone  
I'm a carbon based caveman  
Honey just flesh and bone

I ain't no clone  
I'm just flesh and bone  
Trying to connect with you  
I ain't no clone  
I'm just flesh and bone  
Trying to get my message through

Now we live in this age of computers  
They run everything in the world

And I'm a little behind on this technical climb  
And you are an internet girl

I've got words but no processor  
I've got feelings but I don't know dos  
So I just have to go back to basics  
To try to get my point across

Desperate for a glimpse of the future  
We use crystals and cards and dice  
And that y2k is coming our way  
They're talking about some worldly strife

It's time to think of simpler options  
It's time to formulate a big plan b  
So if your hard drive does crash  
I've got some kruggerands stashed  
Come on and sail away with me

I can't fax you my love  
I can't email my heart  
I can't see your face in cyberspace

I don't know where to start

I'm light years behind  
From the age they call stone  
I'm a carbon based caveman  
Honey just flesh and bone

I ain't no clone  
I'm just flesh and bone  
Trying to connect with you  
I ain't no clone  
I'm just flesh and bone  
Let's run away to timbuktu

(spoken) oh yeah baby come on run away  
Don't worry I don't bite  
I might nip a little bit  
Here let me get that
