

Jimmy Dean, January April And Me

In the 1957 blue and green two door sedan
We divided all we own and I've packed all I can
The back seat's piled high with things in the front seat tears are flowin'
And I'm drivin' down a lonely road without a single thought to where we're goin'
But January April and me we're pullin' out so you can be the girl you wanna be
You go ahead little miss uptown ride high ride free
But say goodbye to January April and and me

[guitar]

The tiny rocker teddy bear and dolls are gone and won't be in your way
I forgot that ol' pipe you never liked just throw it away
I don't think April understands but January's cryin'
I know what her heart is goin' through
Here we are the three of us leaving yet not knowin'
For a long time you'll be a pretty big part of everything that we do
And knowin' you'll be a part of all we do
But January April and me...
