

# Joel Plaskett, Absentminded Melody

Lean on in and let me bend your ear  
I heard a little love would go a long way here  
If I could, I'd get lost tonight  
In the deep dark woods under the neon light

When your light turned green  
And the lamp got lit  
I made my first mistake  
And man I paid for it

What do you want me to do  
To make it happen now, happen now  
What do you want me to do  
To make it happen now, happen now

All my life  
Man I been running scared  
When I turn around  
I don't see nobody there

To be alone  
To come undone  
To be the one  
To be with you  
To be alone  
To come undone  
To be the one  
To be with you

What do you want me to do  
To make it happen now, happen now  
What do you want me to do  
To make it happen now, happen now  
What do you want me to do  
To make it happen now, happen now  
What do you want me to do  
To make it happen now, happen now
