

John Hiatt, Feels Like Rain

Down here the river meets the sea

And in the sticky heat I feel ya' open up to me

Love comes out of nowhere baby, like a hurricane

And it feels like rain

Underneath the stars lying next to you

Wondering who you are baby

How do you do?

When the clouds blow in across the moon

And the wind howls out your name

Feels like rain

We'll never make that bridge tonight

Across lake Ponchartrain

Feel like rain

Batten down the hatches

But keep your heart out on your sleeve

A little bit of stormy weather, that's no cause for us to leave

Just stay here baby, in my arms

Let it wash away the pain

Feels like rain
