

# John Lennon, Bring On The Lucie (Freda Peeple)

We don't care what flag you're waving  
We don't even want to know your name  
We don't care where you're from or where you're going  
All we know is that you came  
You're making all our decisions  
We have just one request of you  
That while you're thinking things over  
Here's something you just better do

Free the people now  
Do it do it do it now

Well we were caught with our hands in the air  
Don't despair paranoia is everywhere  
We can shake it with love when we're scared  
So let's shout it aloud like a prayer

We understand your paranoia  
But we don't want to play your game  
You think you're cool and know what you are doing  
666 is your name  
So while you're jerking off each other  
You better bear this thought in mind  
Your time is up you better know it  
But maybe you don't read the signs

Well you were caught with your hands in the kill  
And you still got to swallow your pill  
As you slip and you slide down the hill  
On the blood of the people you killed

Stop the killing now  
Do it do it do it now  
Bring on the Lucie
