Jon Bon Jovi, Secret Dreams

Riding high, then shot down I load my guns to fire another round I look deep into your eyes And can't run there's nowhere left to hide. Don't stop, no it's much too late When the night comes I can't wait Oh I live, love to loose control It makes me crazy I want to let you know. Oh, no, I don't want to fall Oh, oh, can't you hear me calling All night long in my secret dreams You tell me I'm the one When I'm next to you-next to you. All I want in my secret dreams Is you here with me. I got to get to you, get to you, get to you. There's a thrill, in the chase We won't lose when we meet face to lace. Love, games a means without and end. I go down but I'll be back again Thru' the night with no retreat When your with me in my sleep. Oh, no, I don't want to fall Oh, oh, can't you hear me calling All night long in my secret dreams You tell me I'm the one When I'm next to you-next to you. All I want in my secret dreams Is you here with me. I got to get to you, get to you, get to you... All night long in my secret dreams You tell me I'm the one When I'm next to you-next to you. All I want in my secret dreams Is you here with me. I got to get to you, get to you, get to you. I can see you I feel you every night I need you But I'm only dreaming All night long in my secret dreams You tell me I'm the one When I'm next to you-next to you. All I want in my secret dreams

Is you here with me.
