Jon Secada, Where Do I From From You

(lyrics & music by diane warren)

Empty sky where the stars used to be
They shine for everybody else
But don't shine for me no
Since you went away
Ever since you took your love away from me
Rainbows fade
They fade to black and white
No it's never gonna be the same
The same without you in my life girl
'cause you were the best thing I ever had
I'll never find another love like that
So tell me, tell me.

Chorus
Where do I go from you
A lonely street is where every road
Is gonna lead me to oh, oh
What do I do with these blues baby
I wanna know, where do I go from you.

I should've took the time
To show you how much I care
Should've realized just what I had
When I had you there
I let you get away
Should've never let you get away from me
Miss your smile
I wish I was with you girl
I regret the day I threw away

The sweetest heaven ever found baby
'cause you were the best thing I ever had, yes you were
Where do I find another love like that
So tell me, tell me baby yeah.

Chorus
Where do I go from you
A lonely street is where every road
Is gonna lead me to oh, oh
What do I do with these blues baby
I wanna know, where do I go from you.

'cause I keep wonderin' what I'm gonna do
'cause I could search every place
But I'll never find someone
To take the place of you
No it's just no use, it's just no use
Where do I go baby tell me please.

Chorus
Where do I go from you
A lonely street is where every road
Is gonna lead me to oh, oh
What do I do with these blues baby
I wanna know, where do I go from you
Where do I go from you
A lonely street is where every road
Is gonna lead me to
Where do I go from you
A lonely street is where every road.
