

Jonas Brothers, Out Of This World

It was cloudy on that night
There were no stars in sight
Then the planets are aligned
When i saw her eyes
One look thats all it took
To send me to another galaxy

She said she was on her way to Mars
Then she ran into a star
And she fell into my arms
Thank you gravity
Never let her go
I hide her UFO
She'll never have to know
She's my space girl
And she's out of this world

We were watching Star Wars
She looked kinda bored
Said she'd seen it all before
Made me wonder even more
Which universe was hers
What galaxy did she call home
(Yeah)

She was on her way to Mars
Then she ran into a star
And she fell into my arms
Thank you gravity
Never let her go
I hide her UFO
She'll never have to know
She's my space girl
And she's out of this world
