

Jónsi, Go Do

Go sing too loud
Make your voice break - sing it out
Go scream do shout
Make an earthquake
You wish fire would die and turn colder
You wish your love could see you grow older
We should always know that we can do anything

Go drum do go out
Make your hands ache - Play it out
Go march through crowds
Make your day break

You wish silence released noise in tremors
You wish I know it surrender to summer
We should always know that we can do everything
Go do you'll know how to
Just let yourself fall into landslide
Go do you'll know how to
Just let yourself give into low tide
Go do!

Tie strings to clouds
Make your own lake - Let it flow
Throw seeds to sprout
Make your own break - Let them grow

Let them grow (Endless summers)
Let them grow (Endless summers)
Go do endless summers

You will survive we'll never stop wonders
You and sunrise will never fall under
You will survive we'll never stop wonders
You and sunrise will never fall under
We should always know that we can do anything
Go do!
