

Jordan Fisher, All About Us

Flay away with me baby
I been falling for days
Been lost in the maze
I hope you can save me
Coz we are going higher
We could both touch the sky
Let's follow the Sun's love

So let's start off like we'll never stop
Baby just be still
Let your body talk to me
I'll give you everything you need
We could run away to get a place
So let down your hair
Baby, set your mind at ease
We'll be living in a dream

Coz tonight, the stars are shining bright
The ride for you and I
No, it's not about luck
This is all about us
This is all about us!
So why don't we live if we're alive? ;)
Gotta open up our eyes
No, it's not about luck
This is all about us
This is all about us!

Fly away with me baby
Let me show you the World where pain doesn't exist
If you could begin to come with me for a minute
I'll give you the things I know you're fascinating in

So let's start off like we'll never stop
Baby just be still
Let your body talk to me
I'll give you everything you need
We could run away to get a place
So let down your hair
Baby, set your mind at ease
We'll be living in a dream

Coz tonight, the stars are shining bright
The ride for you and I
No, it's not about luck
This is all about us
This is all about us!
So why don't we live if we're alive?
Gotta open up our eyes
No, it's not about luck
This is all about us
This is all about us!
