

Josh Groban, With You

Sometimes I remember reasons I let you go
Inside them I see your face and all I really know
I was scared to share the love I have inside of me
Through all the heartache I know that I was meant to be...

With you
I have everything I've ever wanted
Simple and true
With you
Crying eyes so beautiful
It's you who always thought our love would see us through

If I could follow my heart again it would be yours
with every breath I would find a way to love you more
I can't imagine life without your silent bravery
And I'm grateful for every moment that I get to be...

With you
I have everything I've ever wanted
Simple and true
With you
Loving eyes so beautiful
It's you who always finds a way

And if the stars should disappear
In the dark I'll still be here
Forever in your arms where I belong

With you
I have everything I've ever wanted
Simple and true
With you
Loving eyes so beautiful
It's you who always knew our love would see us through

With you
