Josh Groban, With You

Sometimes I remember reasons I let you go Inside them I see your face and all I really know I was scared to share the love I have inside of me Through all the heartache I know that I was meant to be...

With you
I have everything I've ever wanted
Simple and true
With you
Crying eyes so beautiful
It's you who always thought our love would see us through

If I could follow my heart again it would be yours with every breath I would find a way to love you more I can't imagine life without your silent bravery And I'm grateful for every moment that I get to be...

With you I have everything I've ever wanted Simple and true With you Loving eyes so beautiful It's you who always finds a way

And if the stars should disappear In the dark I'll still be here Forever in your arms where I belong

With you I have everything I've ever wanted Simple and true With you Loving eyes so beautiful It's you who always knew our love would see us through

With you
