

Jucifer, Memphis

it's all around it's all you conceal
it's all around
it's all you can feel
it's all around so awkward and real
it's all around
and won't let you heal

it's all around
it's all you can hear
it's all around each truth that we fear
it's all around
and no one is near
another night
and then disappear

who said it's over
i want you beside me
wearing the salt that we wept

it's all around it's all you can hear
it's all around
each word that we fear
it's all around

this shadow so near
it's all around
it's our souvenir

who comes to hold you when
no one remember
who makes that bed where we slept
hotel in memphis
i want you to find me
tell me again why you left
