

July For Kings, Dissapear

A lonely night a guitar
and the sky
if you knew I was here
do you think you would stop by
I long for the days when I knew
what to do with my time.
but I'm just too proud to apologize
when you don't come around and you're wondering why
I'm too fucked up to see with my own eyes
Don't you know that I need you around
don't you know that nothing I've found
really feels like it does when you're here
and I fear it all might disappear.
don't disappear.

It's the way we talk like we're real and alive
it's cigarettes when it's cold outside
when girls and guitars
were always so far away
it's the way you won't care when I play this song
it's the way that you hear but you don't sing along
it's my fear of losing it all
but girls and guitars
well I'm still here

Don't you know that I need you around
don't you know that nothing I've found
really feels like it does when you're here
and I fear it all might disappear.
don't disappear.
please don't disappear
don't go and disappear

I tire of this view from the castle
it's all just lies and love--a crowded alone

Don't you know that I need you around
don't you know that nothing I've found
really feels like it does when you're here
and I fear it all might disappear.
don't disappear.
please don't disappear
don't go
don't go
