

Jump Little Children, Made It Fine

A song for when you go to keep you company,
A song for when you go so you'll think of me.

A song for when you go to California,
West of the city lights across America.
A song for when you go out on the interstate,
Under the power lines.

Call me and I'll know that you made it, you made it fine,
Call me and I'll know that you made it,
Call me and I'll know that you made it fine.

A song for when you go to keep you company,
A song for when you go far away from me.

A song for when you go beyond the satellites,
Under the cooling tower on such a starry night.
A song for when you go through steel and shatterproof
Glass on the nine exchange.

You made it fine... (3x)

Call me and I'll know that you made it, you made it fine,
Call me and I'll know that you made it,
Call me and I'll know that you made it fine.

I see your image from time to time under the street lights.
Caught in the breakers floating away in phosphorescence.
Here's a song before you go...

You made it fine... (3x)

Call me and I'll know that you made it, you made it fine,
Call me and I'll know that you made it,
Call me and I'll know that you made it fine.
(2x)
