Spaceships detected nearby
Floating right there over the Earth

Into the light

[Arkens]:

A universal language, long ago spoken by our forefathers
A sole council governing the world, same laws for everyone
Forget your time, your scales and moneys
Forget your myths and your gods

Physical or psychological violence shall never be done
For man is still a weak instinctual animal"

[Realitionists]:
"Who do you think you are to tell us what to do?
What do we owe you? You can't just take control
We will resist, until the end
How could you come to us and not speak
In the name of..."
