

Karnivool, Fade

You said "Just show me what you wanna be, I will never stand in your way", take it back

You know I sat here thinking just the other day, what it was you said to make me snap, you were all

Yeah but in my mind I see clearer...

Take me back into the other day when I was so proud to hear myself. You would slap me and I know

Yeah but in my mind I see clearer now, that I've found somewhere to rest my head.

In time I guess this will fade.

You said "show me what you wanna be, I will never stand in your way", take it back and

Yeah but in my mind I see clearer now, that I've found somewhere to rest my head.

In time I guess this will fade.

Slap me up again, just slap me up again.
