

Kasia Nosowska, Electrified

were here we are an enity
we are the open sea
we are the nothing
but ship wrecked alive
we are the atom split
we are the complex tric
we are the nothing but
simple one form over-reactive
dreams nothing but memory
we are illogic fantastic belief
if were on a loosing streak
finding the things we seek
were gonna answer
our questions
fear no evil everyday
people stay electrified
were here we are the energy
we are city streets
we are the inner
frustrations one love
we are the broken hearts
we are the brand new starts
we are the cause of comotion
at times out of our depth
it seems nothing but history
we are the over distracted
belief if were on a loosing
streak finding the things
we seek were gonna answer
our questions
