

Kate Alexa, We Are Together

I never thought I'd see the day
That we would ever be this way
I never thought that it would change.
But now I finally realise
That what we had was no disguise
When I look into your eyes.
But things can only get better
We'll try to stick together
We're all together
And I wouldn't want it any other way right now
We're all together
And there's nothing else that matters anyway
Now we are together again
I know we see in different ways
I know we'll never be the same
But that's okay
Don't wanna search for something new
Not after all that we've been through
I don't know any other way
But things will only get better
Now we're here together
We're all together
And I wouldn't want it any other way right now
We're all together
And there's nothing else that matters anyway
Now we are together again
Now that everything's alright
We can finally do what's right
And hold on
Am moving forward
Moving fast
I know this thing we have will last
We're all together
And I wouldn't want it any other way right now
We're all together
And there's nothing else that matters anyway
We're all together
And I wouldn't want it any other way right now
We're all together
And there's nothing else that matters anyway
Now we are together again
We're all together
And I wouldn't want it any other way right now
We're all together
And there's nothing else that matters anyway
Now we are together again
