

# Kavana, Wait For The Day

when you feel that you've had enough  
and you know that it's just too much  
don't look back, you've got to walk right on  
one day soon you're gonna realise  
your time will surely come

and every day i feel i'm learning more  
i search out for the positive and the rest i ignore  
our future lies in each others hands  
(never look back, never, never look back)

chorus:

we've got to wait for the day  
when we finally say  
tomorrow will bring a better way  
if we hold on to the love  
then we'll have enough  
and tomorrow will bring a better day

just because it's all been said and done  
doesn't mean you won't find the strength again to carry on  
keep the faith and you'll pick up again  
don't worry baby you've got to start first  
before you reach the end

and every day i feel i'm learning more  
i search out for the positive and the rest i ignore  
our future lies in each others hands  
(never look back, never, never look back)

repeat chorus

i gotta keep on waiting for the love, waiting for the love
