

# Keith Urban, Shine

Winter's weighing on your shoulders  
It's hanging around a little too long  
And I can see it in your eyes  
You've taken on a load that's just too strong  
Oh, but let me get down to the heart of the matter  
Baby, if you want I can make it better now

When the sun is hard to find  
When it's raining in your eyes  
When the shadows block those pretty little blue skies living inside you  
When the falling of your tears, makes a candle disappear  
When you just can't see the light  
Baby, I'll find a way to shine  
I'll find a way to shine

Everybody's got a cross to carry  
Everybody's got a story they can tell  
Ya know you're not the only one counting on a quarter and wishing well  
Woah don't you sit there with your heart under lock and key  
Gimmie one chance baby, I can set you free

When the sun is hard to find  
When it's raining in your eyes  
When the shadows block those pretty little blue skies living inside you  
When the falling of your tears, makes a candle disappear  
When you just can't see the light  
Baby, I'll find a way to shine  
I'll find a way to shine

Sometimes in this life good luck don't shine like it suppose to do  
When there's no one you can trust and they just keep on giving up on you  
Baby, don't ya know that I won't ever let ya down  
Come on now, wooo

Oh, don't sit there with your heart under lock and key  
Just gimmie one chance and baby, I can set you free

When the sun is hard to find  
When it's raining in your eyes  
And the shadows block those pretty little blue skies living inside you  
When the falling of your tears, makes a candle disappear  
And you just can't see the light  
Baby, I'll find a way to shine  
I'll find a way to shine  
Find a way to shine  
Find a way to shine  
You know I'll find a way

Find a way, find a way

Find a way to shine
