

# Kenny Chesney, I Might Get Over You

Well I opened my heart, and I let you in  
I promised I'd never love again  
And still doin' what I'd said I'd do  
Someday I might get over you

I wear my ring on a chain now, instead of my hand  
And I deal with your memories the best I can  
I've even been out on a date or two  
Someday I might get over you

Oh I never thought I'd see it  
But I think I see the light now  
I know that what I have to do  
Is get on with my life but I can't take another day  
I can't face another night, so I just take another breath  
And let it go

If I could ever feel the way I felt  
I'll take a chance with someone else  
And if my heart takes chances too  
Someday I might get over you

Oh I never thought I'd see it  
But I think I see the light now  
I know that what I have to do  
Is get on with my life, but I can't take another day  
I can't face another night, so I just take another breath  
And let it go

Well I opened my heart, and I let you in  
I promised I'd never love again  
Right now it's still somethin' I still can't do  
Someday I might get over you  
Though it may not be 'til my life is through  
Someday I might get over you
