

# Kenny Chesney, No Small Miracle

In a little town down south  
There's a little clapboard house  
With a wolf outside the door  
In the bedroom there's a light  
That's been staying on all night  
For atleast a month or more  
The heartaches and the bills keep coming due  
And with all they're going through....

It's no small miracle that love hangs on  
Hearts get weary when hope is gone  
In a world where roses wither and die  
It's no small miracle when love survives

It's been uphill for a while  
But he still makes her smile  
Every now and then  
Lately they've been findin' out  
It's the little things that count  
And they do what they can  
He tells her he loves her everyday  
She says things will be okay

It's no small miracle that love hangs on  
Hearts get weary when hope is gone  
In a world where roses wither and die  
It's no small miracle when love survives

In a world where roses wither and die  
It's no small miracle when love survives
