

Kevin Denney, That's What I Believe

THAT'S WHAT I BELIEVE

There's nothing like a good home grown tomato and kids these
Days still watch too much T.V. folks don't stick together like
They used to I may be wrong but that's what I believe
Our government can sure throw away some money but don't give
Enough to those who really need no one's ever gonna love you
Like your mama she told me so and that's what I believe
I'm convinced good friends make life worth living and
Cornbread goes with almost everything these things
May not mean anything to anyone but me but that's O.K.
'cause that's what I believe
There's nothing wrong with praying in the classroom there ought
To be a law against plastic christmas trees true love only
Comes around once in a lifetime darling you are mine and that's what I believe
I'm convinced good friends make life worth living and
Cornbread goes with almost everything these things
May not mean anything to anyone but me but that's okay
'cause that's what I believe
