

Kid Down, I'm Your Villain

I bet the situation turned into a nasty one
So bring your guns and make your move
It maybe looked like one step forward when we lost it down the road
One giant leap would be my choice

I panicked and I ran
Lost track with no way back
I picked up on this trace
Will it lead me further?

Hold on my friend
Or the wind will hit you down again
It's all one big mess
Lets hope the storm will fade away

Stop
Spread all the way out to my finger tips
As Frightening as a million ghosts
Am I the bad cop this time since I'm out there to get you?
No, I steal and plunder - I hope that you don't mind
I think that we should break the curse or break it all
Like a burn the pain is constant when it falls
Better run, hide, I made my move
Felt like shit then somehow got it right and now I'm through
I'm a villain just like you

Hold on my friend
Or the wind will hit you down again
It's all one big mess
Lets hope the storm will fade away

I think that with time you'll understand
That for once my life has a plan
I won't let it go away that easy, that's for sure
So I had to be straight with you, hell, we would've lost
I won't take it back, no way, no way

Hold on my friend
Or the wind will hit you down again
It's all one big mess
Lets hope the storm will fade away

Hold on my friend
Lets hope the storm will fade away
The storm will fade away
